Frontend: React.js, Next.js, Redux, Tailwind CSS, SCSS/Sass, Material UI, Ant Design, Bootstrap, Radix UI, Shadcn UI, Styled Components, Vite, jQuery

Backend: Node.js, Express.js, Django, Laravel, LiveWire, REST APIs, Axios

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Mobile: Android (Java), Android Studio

DevOps & Platforms: Git, GitHub, Docker, Vercel, XAMPP, WAMP

WORK EXPERIENCE

Web App Developer Intern — *2026 – Present*

Myt Soft Dev Solutions — Philippines

- Contributed to multiple active client systems including ERP, POS, Inventory, HR, and internal management tools.
- Developed and enhanced frontend features across modern and legacy applications using React, TypeScript, and PHP.
- Built dynamic, reusable, and scalable UI components using Material UI, Ant Design, Bootstrap, and Styled Components.
- Integrated APIs and managed data flow across complex business modules using Axios.
- Created interactive dashboards, reports, tables, and forms for operational workflows with Chart.js and React Data Table.
- Implemented PDF generation, printing, and data export functionalities using jsPDF, html2pdf, and xlsx.
- Fixed UI/UX issues and improved system responsiveness and overall performance.
- Collaborated closely with Project Managers and backend developers to deliver new features and system improvements.
- Maintained frontend code in accordance with the company's coding standards and development environment.

Freelance Frontend Developer — *January 2023 – Present*

Remote — Client of the Internet

- Consulted with small businesses, portfolio owners, and digital professionals seeking to showcase their work and services.
- Built modern websites using React, Next.js, TypeScript, Tailwind CSS, Material UI, Shadcn UI, and Radix UI.
- Built modern, reusable UI components focused on accessibility, clean design, and mobile-first performance.

Freelance Web App Developer — *March 2022 – Present*

Remote — Various Clients

- Built full-stack web applications for community schools and organizations, including websites, systems, and digital platforms.
- Developed modern, scalable solutions using Next.js, JavaScript, Python, Express.js, and PHP.
- Integrated MongoDB, MySQL, PostgreSQL, and Firebase to handle dynamic data and improve app functionality.
- Maintained multiple projects simultaneously with timely delivery and client-focused communication.

Faculty Associate — Facilities & Administrative Services *May 2023 – December 2023*

Southwestern University PHINMA, Cebu

- Managed procurement, property management, and inventory tracking in compliance with university regulations.
- Oversaw general administrative workflows including records management, supply encoding, and inter-department coordination.
- Supported departmental operations through professional written and verbal communication.

PROJECTS

Academia Access — Student Portal

Tech Stack: React · Vite · Tailwind CSS · JavaScript · jQuery · HTML · PHP · Laravel · LiveWire · MySQL

- Built a comprehensive student portal management system with role-based access for admins, students, and teachers.
- Enabled students to enroll in courses, track grades, and receive real-time notifications; teachers to manage content and communicate.
- Implemented backend with Laravel and LiveWire, and a responsive frontend with Vite and Tailwind CSS.

E-Commerce Platform (Tank Trove — Aquatic Store)

Tech Stack: React · Redux · Tailwind CSS · React Query · Framer Motion · Node.js · Express · MongoDB · JWT · Vercel

- Developed a full-featured e-commerce platform for selling fish and aquatic products with product catalog, filtering, and cart functionality.
- Integrated secure user authentication with JWT and Stripe for checkout; built admin dashboard for inventory management.
- Deployed on Vercel with a clean, animated UI using Framer Motion and React Query for efficient data fetching.

DigiBayan — Barangay Information Management System

Tech Stack: JavaScript · Bootstrap 5 · HTML · CSS · jQuery · AJAX · PHP · MySQL · jsPDF · XLSXjs · XAMPP

- Designed a comprehensive web platform to digitize barangay operations including permit applications, resident data, and certifications.
- Built real-time analytics dashboard and record management features to reduce manual paperwork and processing time.
- Implemented document export with jsPDF and XLSXjs; deployed locally via XAMPP.

Barangay System Portal

Tech Stack: HTML · CSS · JavaScript · Bootstrap 5 · jQuery · PHP · MySQL · Chart.js · XAMPP · WAMP

- Built a web application to streamline barangay management with community announcements, event calendars, and service requests.
- Implemented resident registration, data analytics dashboard, and user-friendly navigation for officials and residents.

Lease Track — Rental Monitoring System

Tech Stack: PHP · MySQL · Bootstrap · JavaScript

- Developed a rental monitoring system to help landlords manage house rental records, tenant tracking, and payment schedules.
- Built a clean, responsive dashboard for efficient management of multiple rental units.

Academia Access — Property Ease Management System

Tech Stack: PHP · MySQL · CRUD · Bootstrap

- Created a PHP-based apartment management dashboard enabling landlords to manage tenants, rooms, and property records.
- Implemented full CRUD operations with a user-friendly interface for efficient property and tenant management.

Trucking Rental Services Web App (JDTS)

Tech Stack: React · JavaScript · PostCSS · Firebase · CSS

- Developed a web app for a trucking services provider offering information on fetch, freight, and delivery services.
- Integrated Firebase for data management and built a responsive React frontend with PostCSS styling.

Eternal Canvas — Tattoo Shop Web App

Tech Stack: Vite · Web Design · Shop Portfolio

- Built a tattoo shop web application for booking appointments, exploring designs, and showcasing the shop portfolio.
- Designed a visually striking UI aligned with the brand identity using Vite for fast development.

Resort Website (Majestique View Resort)

Tech Stack: HTML · CSS · Tailwind CSS · JavaScript

- Developed a responsive multi-page resort website with booking information, gallery, and contact sections.
- Optimized for performance and cross-browser compatibility with a clean, mobile-first design.

Apex Studio — Digital Marketing Agency Website

Tech Stack: Marketing · Digital · Content

- Built a professional digital marketing agency website helping businesses grow through data-driven strategies.
- Focused on clear content hierarchy, brand presentation, and conversion-focused design.
